MICRONZ

aniCARE+

PROBIOTIC FEED SUPPLEMENT

Micronz AniCare+ is an improved probiotic feed supplement for Animals and Birds, it also acts as an Ensiling agent that helps restore the natural microbial balance in the digestive system, abling maximum extraction of nutrients from the fodder.

The mechanism by which Micronz AniCare+ improves feed conversion efficiency which includes alteration in intestinal flora, enhances the growth of non-pathogenic facultative anaerobic & gram positive bacteria forming lactic acid and various useful metabolites, also suppress the growth of intestinal pathogens; hence improves the digestion with proper utilization of nutrients. Therefore, the major outcomes while using Micronz AniCare+ includes improvement in growth, milk production and better digestion efficiency etc.

BENEFITS

- It increases the quantity of **milk & fat production** in ruminants and meat in poultry.
- It improves **digestion & assimilation of the nutrients** that leads to excellent health, weight gain and optimum productivity.
- It effectively controls or suppresses the foul odor that is very common to livestock & poultry farms.
- **Improvement in immune system leading to reduction in diseases.**
- It provides protection of liver against Mycotoxins, feed contaminants, antibiotics, antiparasitics and metabolites of chemical drugs, where the liver is directly or indirectly at risk.
- Micronz AniCare+ acts as **an anti-stress and anti-oxidant** that helps to reduce stress caused through transportation, temperature variations, high production, de-worming and exposure to antibiotics and other chemical medications etc.
- Micronz AniCare+ is **cost effective** in nature that reduces usage of other inputs drastically.

APPLICATION

ANIMALS/BIRDS पशु / पक्षी	INTAKE RATE सेवन दर	
	with FEED चारे के साथ	with WATER पानी के साथ
Cows / Buffaloes and Calves गाय / बैस व बछड़े	100 ml and 50 ml Per Head/Day	150ml and 100 ml Per Head/Day
