ALSO TRY

aniCARE+

An improved probiotic feed additive for Animals and Birds, it also acts as an Ensiling agent that helps restore the natural microbial balance in the digestive system, enabling maximum extraction of nutrients from the fodder.

aquaPRO+

A microbial formulation that acts as probiotic feed supplement for aquatic population such as fish, prawns, molluscs etc while improving the health & balances the complete Pond and Lake Ecosystem.

bioCLEAN

A bioaugmentation and bioremediation agent to treat waste water from ETP's, STP's, Lakes, Drains, Ponds etc naturally while reducing the cost of treatment.

soilBOOST

An advanced Composting agent that contains various microbial combination to degrade agricultural/Industrial waste with the help of other naturally occurring microbes.

masterCLEAN

A complete organic multipurpose cleaner which is a mixture of various herbal extracts, plant juices, fermented end product to remove dirt, stains, oil, grease etc. also acts as a disinfected agent.

freshSTART

A liquid concentrate with a fast action foul odor controlling or suppressing property.

agricURE+

Improved Microbial
PLANT GROWTH PROMOTER

HIGHER YIELD
BETTER QUALITY OF CROPS
EFFICIENT SEED TREATMENT
PEST & INSECT REPELLENT
HIGHER SHELF LIFE OF CROPS
100% ORGANIC
CERTIFIED INPUT

MICRONZ™ agriCURE+

Improved Microbial PLANT GROWTH PROMOTER

Micronz Agri Cure+ is an improved microbial plant growth promoter with seed treatment, soil conditioning and pest repellent features to increase quality, quantity & durability within the area of farming or plant cultivation. It reduces the cost while reducing the dependency of chemicals and fertilizers.

It is a natural remedy in liquid formulation created with an intense research to cure farmer's common problems in Agriculture & Horticulture. Micronz AgriCure+ is manufactured from naturally occurring microbes such as *Lactobacillus*, *Yeast*, *Actinobacteria*, *PSB* etc. with appropriate selective media & duly inspected & certified in accordance with the requirement of the International Federation of Organic Agriculture Movement (IFOAM).

BENEFITS

- Accelerates plant growth while improves the intake of nutrients.
- Improves germination of both seed & saplings.
- Development of deeper, extensive white & secondary root systems
- Effective pest controlling features.
- Produce quality improves in terms of appearance, taste & shelf life.
- Improves soil fertility
- Higher shelf life of crops with better quality

LONG TERM BENEFITS

- Reduction of fertilizer usage through improved microbial soil balance.
- Promotes development of the humus layer
- Increase resistance to drought
- Improves resistance against diseases
- Increase microbial population in soil
- Protection against night frost damage in growing fruits

Our technology based on a certain consortium of selective microorganisms associated with plants to fulfill important functions for plant growth and health. The complete mechanism of plant-microbes interactions is based on improved nutrient acquisition and hormonal stimulation with the suppression of plant pathogens, which is often indirectly connected with plant growth and used as biofertilizers, plant strengtheners, phytochemicals, and biopesticides. Altogether, the use of microorganisms and the exploration of beneficial plant-microbes interactions with agricultural science, we are offering promising and environmental friendly products for conventional and organic agriculture worldwide.

SEED TREATMENT

- Place the seeds/saplings in a neat-clean & dry place.
- Dilute a liter agriCURE+ in 15 liters of fresh water & mix the seeds/sapling properly with diluted AgriCure+ for overnight.

**Carry out seed or saplings treatment a day before sowing.*

बीज उपचार

- एक साफ व सूखी जगह में बीज/पौधे को रखें।
- १५ लीटर पानी में १ लीटर agriCURE+ घोलें तथा बीजों को पूर्ण रूप से जलमिश्रित agriCURE+ में मिला कर रखें।
- बीज/पौधे का उपचार बुवाई के एक दिन पहले करें।

SPRAYING

FOR LONG DURATION CROPS

Dilution Ratio : 1:15 litres (agriCURE+ : Clean Water)
Spray 3 liter/acre for long duration crops (3-6 month time frame) such as Sugarcane, wheat, Rice, fruits etc.

FOR SHORT DURATION CROPS

Dilution Ratio : 1:20 litres (agriCURE+ : Clean Water)
Spray 2 liter/acre for short duration crops (1-3 month time frame) such as vegetables, flowers etc.

- Spray diluted agriCURE+ twice in a month with proper soil drenching & top dressing.

**Increase the dosage for pest & insect affected crops.*

छिड़काव

- **जलमिश्रित अनुपात : १:१५ लीटर agriCURE+ : साफ पानी।**
लम्बी अवधि की फसलों जैसे गन्ना, गेहूँ, चावल, फल आदि (३-६ महीने की समय सीमा) के लिए ३ लीटर प्रति एकड़ छिड़कें।

- **जलमिश्रित अनुपात : १:२० लीटर agriCURE+ : साफ पानी।**
छोटी अवधि की फसलों जैसे सब्जियों, फूल आदि (१-३ महीने की समय सीमा) के लिए २ लीटर प्रति एकड़ छिड़कें।

- जलमिश्रित agriCURE+ को माह में दो बार उचित मात्रा में मिट्टी व शीर्ष ड्रेसिंग के साथ छिड़कें।
- कीट प्रभावित फसल के लिए खुराक में वृद्धि अवश्य करें।

CAUTIONS

- Do not mix with any pesticide & insecticide
- Ensure presence of compost in soil
- Shake well before use
- Do not spray in a speedy wind or bright sunny day
- Store in room temperature
